

CA-NF42 UHD DUAL LENS CAMERA

With its dual 4K cameras and AI-enabled auto license plate recognition (ALPR), the CA-NF42 in-vehicle camera provides unprecedented visibility and capability on patrol.

Auto License Plate Recognition

Artificial Intelligence (AI) enables automated license plate recognition (LPR) from up to 65 feet away, enabling faster tracking down of vehicles and smoother, safer driving.

Dual 4K Resolution

Both the wide-angle and standard camera feature up to 4K Ultra HD resolution with high dynamic range (HDR) encoding for clear detailed images in any ambient lighting.

Wide Field of View (FOV)

A wide field of vision helps keep traffic stops and other events entirely on camera, while providing a broader view of what's happening in a scene's surroundings.

Low Light Viewing, ZeroDark™

Both cameras deliver superb low-light performance with minimal visual noise in dim, ambient, or indirect lighting.
