Management

Save Time, Mitigate Risk, Simplify Device Management

The deployment of one Android device at a time is impractical and mistakes can cause headaches. Managing device settings across an organisation involves diverse requirements, constant change management, compliance to essential settings, and the risk of errors from manual setups. Getac Management is a cloud-based enrollment, configuration, and management solution that brings scalability, precision, and over-the-air convenience to Getac Android ownership. Mitigating the risk of costly security breaches and device downtime caused by configuration errors and firmware updates.

Discover an easier way to manage your Getac devices.

Time Saving

Batch configuration,
Cloud-based
deployment,
over-the-air updates,
and a variety of
other measures.

Risk Mitigation

Minimizing repetitive
configuration work and
automating firmware
updating. Set policies and
restrictions to ensure the safety
and integrity of devices.

Easy Management

Simple configuration setup with
comprehensive configurable
settings. Add new devices in
seconds by simply scanning a QR
Code or connecting devices to
the internet.

Top 5 Challenges in Mobile Device Management

1

ENROLLMENT

Many organizations find that enrolling devices takes longer than expected, affecting deployment timelines.

2

CONFIGURATION

Companies struggle with maintaining consistent configurations across all devices.

3

PROVISIONING

Organizations face scalability issues when provisioning devices for larger teams.

4

MANAGEMENT

Many field service companies experience difficulties in the centralized management of their mobile devices.

5

UPDATES

Companies with deployed fleets of devices find it challenging to keep all their devices updated.

Management from Getac is a Cloud-based configuration and management solution that brings scalability, precision, and over-the-air convenience to Getac Android ownership.

Software Features

Over-the-Air Android Device Configuration

- Easily preset devices with selectable configurations
- Unify device usage
- Flexibility to manage multiple configurations for different teams
- Deploy configurations over-the-air

Deploy and Update Apps Over-the-Air

- Keep all apps on your devices consistent through the web console
- Install apps remotely with minimum footprint
- No additional dispatch software needed

App Installation Protection

- Allow users to send app installation requests
- Admin can remotely approve Play Store or other app installation
- Protect devices from malicious apps

Flexible Firmware Updates

- Control the firmware versions and conditions to update firmware
- Keep devices secure and efficient
- Managing groups of devices to use designated firmware versions

Enhanced Enrolment Methods for Every Deployment Scenario

- QR Code Enrolment
- Automated Enrolment
- Close Proximity-Based Bulk Enrolment
- Reduce deployment time & labour costs

Kiosk Mode & Launcher

- Restricts access to authorized apps only
- Simplified user experience with a streamlined, distraction free, & customizable interface
- Prevents user errors & system misuse

Supported Models

Device models currently supported:

- Getac ZX10G1 (Android 12 & above)
- Getac ZX10G2 (Android 13 & above)
- Getac ZX80 (Android 13 & above)

Yearly subscription-based cloud service.
