Rugged Mobile Computing Solutions

Monitoring

Reducing the Risk of Device Downtime

Even the most rugged devices, with their long operational life, need regular health-checks.

Getac has made this easy with a software solution that tracks and monitors deployed Windows and Android devices, spotting potential issues before they impact on field-based personnel.

From a central dashboard, hosted on a secure Microsoft Azure® Cloud Server, Monitoring helps you to maintain operational efficiency and maximize device uptime.

Helping to maintain your technology in the field.

Maximise Device Utilization

Spotting Potential Problems
Proactive to Known Issues
Warning Notifications

Maximise Productivity

Real-time Visibility
Minimise User Frustration

Reduce Operational Costs

Helping to Maintain
Device Uptime

The True Impact of IT Downtime

IT managers need to keep their eye on the ball. With the integration of mobile devices into the general IT infrastructure, even the slightest interruption can impact on:

- Business Performance
- Lost Revenue
- Reduced Productivity
- Recovery
- Rectification

74 min
of productivity are
lost whenever a device goes down.

IT departments spent

70 min
to resolve each incident.
