CHEST PACKS

FOR FIELD USERS OF RUGGED TABLETS

GETAC
SELECT

COMFORT, DURABILITY & VERSATILITY

for field-based users of mobile computers

The Ruxton Packs are designed to provide comfortable and ergonomic support for field users of Getac tablet computers. The tablet is conveniently located in the zippered pouch close to the body. It is securely attached to the pack by a quick release attached to the back of the tablet with self-adhesive hook and loop.

All three sizes of the Ruxton pack come attached to the comfortable Comox harness. The front cover is available in black or high visibility orange, with or without pockets.

The Comox harness is designed to be comfortable for an entire day of work in the field. It is made from mesh with closed-cell foam strips that ensure good airflow. In addition, the harness is designed to be comfortable when worn under a backpack. Attach additional pouches and holsters to this MOLLE compatible harness.

Fold down the front for “HandsFree” use of your tablet. Available in 3 Sizes to fit almost any Getac tablet.

Improved Safety - Keep your hands free when navigating difficult terrain!

Superior Ergonomics - Fold the pack down, slide the tablet away from your body to place the tablet in the optimal position for viewing and data entry.

Increased Productivity - Keep your tablet and other field equipment close at hand and use both hands to perform data entry.

Super Comfortable - The mesh harness is well ventilated and highly adjustable. Comfortable even when worn with a backpack!
