Getac Driving Safety Utility

Reliable In-Vehicle Safety On The Move

Your people are your most valuable assets. Whether they are driving a forklift truck in the warehouse or a commercial vehicle on the road, you need to protect your workforce. Getac Driving Safety Utility is a value-added solution aimed at reducing driver distraction.

WORKFORCE SAFETY FOR COMMERCIAL VEHICLES AND FORKLIFTS

In the US, there are **34,900** serious forklift injuries each year.

Source: Powered Industrial Trucks - Forklifts, Occupational Safety and Health Administration

A truck driver using a device while driving is **23 times** more likely to be involved in an accident.

Source: Virginia Tech Transportation Institute

Driver distraction is one of the leading causes of road collisions.

A major contributary factor is the use of devices in-vehicle while driving.

You need to be just as careful in the workplace because your people are your most valuable assets.

GETAC'S VALUE-ADDED SOLUTION REDUCES DRIVER DISTRACTION ON THE MOVE.

SOLUTION FEATURES

REDUCE DISTRACTED DRIVING
Protect drivers from in-vehicle device distractions on the move by blanking the screen and locking the keyboard, in compliance with regional driving legislation.

PURE SOFTWARE SOLUTION
Getac Driving Safety Utility requires no additional hardware, offering maximum reliability, preventing any bypassing of the solution, and ensuring compliance with safety guidelines.

COST-EFFECTIVE SOLUTION
One-time payment for perpetual license is a cost-effective way to safeguard your workforce, protecting your most valuable assets.

SCREEN BLANKING
Blank the vehicle-mounted computer LCD when the vehicle is on the move.

DUAL MODE SUPPORT
Indoor Mode uses the Getac device's built-in motion sensor to detect motion, whilst Outdoor Mode utilizes a GPS signal.

AUTO SWITCH
Auto detects and switches between GPS and motion sensors.

DESIGNATED APP IN MOTION
Only selected applications, allowed by the administrator, can be launched in motion.

SMART DOCKING
Screen blanking functionality is enabled when the device is docked in-vehicle, then automatically disabled when the device is undocked for field operation.

MULTIPLE LANGUAGE SUPPORT
12 languages supported.
