Rugged Mobile Computing Solutions

Getac KeyWedge Barcode Reader Utility

One-Touch Scanning for your Rugged Devices

Not all industry sectors require a high volume of barcode scanning and simply cannot justify the cost of integrated barcode reading hardware. Our software provides a low cost, easy to implement solution.

EXPAND THE CAPABILITY TO BOOST EFFICIENCY

KeyWedge provides single and multiple barcode scanning features, expanding the capability of any Getac Windows device with a rear camera.

No hardware. No upgrades. No SDK integration required. Simply install the app and you've got a one-touch rugged barcode scanner suitable for standard industrial field use, available on your Getac tablets or laptops.

One download and you are ready to start scanning.

WHY CHOOSE KeyWedge BARGODE READER UTILITY?

Seamless Integration

Fully integrated with Getac devices equipped with rear camera. Be truly mobile without additional hardware barcode scanner required.

Configurable Solution

The template scan mode allows users to configure barcode templates to locate and scan labels efficiently.

Cost-effective Alternative

A cost-effective software solution for low volume scanning of all major 1D and 2D barcode symbologies.

SOLUTION FEATURES

Dual Scan Triggers

Barcode scanning can be triggered in the software scan window or by assigning a hardware button.

Settings Share

Use Settings Share to quickly share current KeyWedge settings to other Getac devices with a simple scan. This feature can also be utilised for quickly switching scan settings while scanning.

Scan Mode

KeyWedge supports scan modes for multiple and continuous scans to match the input for different software use.

Scan History

Click on the scan history to keep track of a list of scanned items or reuse any scanned items for your software.

Multiple Language Support

12 languages supported.

Change Setting via Command Line

Command line scripts can be used for one click setting changes.
