Power, Performance, & Proven Resilience

WHY ANDROID:
LOWER TOTAL COST OF OWNERSHIP WITH GETAC ANDROID

3 Android Versions

5 Years of Security

With Android Enterprise recommended devices, users can expect **minimum of 3 version upgrades** as well as **5 years of security updates**. This means the solution will be at its prime for longer, lowering total cost of operation without sacrificing quality. To go further into Getac's top-tier standard, here are the key advantages of the Android OS:

COST-EFFICIENT

Getac devices have modular designs. This allows you to customize hardware features and optimize performance for your budget while ensuring you're not paying for any unused features. Built rugged, the device itself also provides hardware reliability. The robust design combined with the comprehensive warranty reduce device failure and lower overall TCO.

LOW POWER CONSUMPTION

Android generally uses less power, is more energy-efficient, and has better low-power support than its OS counterparts. Lower power consumption reduces operating costs and extends the lifetime from a single battery charge, which means longer "on" time and directly leads to greater productivity.

INTEGRATED WITH GOOGLE MANAGED SERVICES

Getac has native integration with Google's managed services and powerful ecosystem. Backed by the power of Google, your team can leverage the readily-available services that make device enrollment, configuration, and user adoption as easy and as streamlined as possible.

VARIETY OF APPLICATIONS

Android tablets provide readily-available applications to perform tasks, easily downloadable from Google Play. Getac's range of software improves operational efficiency and makes life easier for the administrator and end users. For any other needs, Getac also collaborates with various independent software vendors.

WHAT SETS GETAC ANDROID SOLUTIONS APART?

NATIVE RUGGED DESIGN

Our fully rugged solutions deliver excellent TCO & ROI with one of the lowest average failure rates in the industry.

EXCELLENT SERVICE AND SUPPORT

Getac offers a 3-year warranty* to cover accidental damage in the harsh working environments.

ENHANCED CONNECTIVITY

Data can be collected through a range of communications technologies such as 4G LTE, Wi-Fi, Bluetooth, and dedicated GPS to keep you connected from anywhere.

BRILLIANT SUN-READABLE DISPLAY

Revolutionary Lumibond® touchscreen display. Greater brightness for enhanced readability in direct sunlight.

CORE SOFTWARE SOLUTIONS

Getac offers a range of software solutions to support the needs of rugged mobile device productivity & accelerated device deployment.

INNOVATIVE VERSATILE DESIGN

Devices offer versatility with full-shift battery life, high-res cameras, and an optional rotating hand strap with a kickstand, vehicle dock and office dock.

*For fully rugged products

---

3 Android Versions

FUTURE-PROOFING YOUR SOLUTION

Elevate your business to new heights as Getac is committed to provide a minimum of three version upgrades for each product generation, delivering an exceptional Android experience and security for your enterprise needs.

5 Years of Security

GUARANTEED LONG-TERM PROTECTION

Get the ultimate peace of mind with timely security updates every 90 days for 5 years after the launch date. Plus, enjoy the added assurance of security patches and support for the Android OS that you're currently using (even beyond designated support period.)

GETAC PRODUCT SOLUTION:
ANDROID OS RUGGED TABLET ZX10 SERIES

The ZX10 10" fully-rugged Android tablet offers an exceptional workday solution that combines the intuitive operation, power efficiency, and world of apps you expect with Android, with a slim versatile profile, built for your industry.

ZX10

ZX10 is available with optional hard handle and other accessories.

ZX10-IP

BUILT RUGGED INSIDE-AND-OUT

On the outside, Getac engineered the ZX10 to withstand challenging conditions with power and versatility. It is MIL-STD-810H certified and can survive 6-foot (1.8m) drops as well as extreme temperatures. On the inside, the tablet uses a Qualcomm Snapdragon 660 CPU, which incorporates more computationally-intensive tasks.

WORKS AS LONG AS YOU DO

With a full-shift battery life as standard, and even optional higher capacity batteries, Getac's Android tablet is built to last your entire workday. ZX10 lasts even longer with its dual hot-swappable batteries changeout without interrupting operation.

CONVENIENT ON-THE-GO USE

For transport, the ZX10 fits into a carry bag. It has an optional hard-handle with multi-notch orientation and works in a 2- or 4-point harness for hands-free access. The ZX10 also integrates with a rotating hand strap with kickstand, and multiple models of vehicle docks.

SUPERB INTERACTIVE EXPERIENCE

Getac Android tablets feature a touchscreen display with a front and rear camera that captures high-quality images and videos, enabling superb video chat and remote guidance. The ZX10 also offers dual-integrated microphones that filter out loud background noises and dual LTE SIM card slots to keep you connected from anywhere.

UP TO 5 YEARS EXTENDED WARRANTY AVAILABLE

Because of the ZX10's durability, Getac offers a 3-year Bumper-to-Bumper warranty to cover accidental damage to the entire device in these harsh working environments. For enhanced total cost of ownership, extended warranty options up to 5 years are available. This benefit provides you the peace of mind that you will be back running in days, minimizing cost and downtime.

RECOMMENDED ACCESSORIES

EXTERNAL DUAL BAY MAIN BATTERY CHARGER

DETACHABLE KEYBOARD

OFFICE DOCK WITH 65W AC ADAPTER

ROTATING HAND STRAP & KICKSTAND

ZX10 FULLY RUGGED TABLET

android enterprise recommended

GETAC'S SOFTWARE ECOSYSTEM

The ZX10 supports Android 12 operating system and is verified by Google™ as an Android Enterprise Recommended Rugged Device. The rugged devices combined with a powerful and sophisticated OS make it even easier to scale and support your mobile fleet.

ENTERPRISE SOFTWARE SUITE

Getac enrollXpress
FREE OF CHARGE

Still struggling with manual device enrollment? With Getac enrollXpress, rolling out devices can be as quick and effortless as a single QR code scan. These enrollment QR codes can be distributed at multiple sites and the enterprise mobility management platform is customizable. Encrypted with high security (EAP) protocols, security is never a concern.

Getac deployXpress

Deploying one Android device at a time is impractical can cause a domino effect of issues. Getac deployXpress is a batch configuration, cloud-based deployment solution that brings scalability, precision, and convenience to Android ownership. This mitigates the risk of costly security breaches and device downtime caused by configuration errors.

Getac OEMConfig
FREE OF CHARGE

If you are already using an MDM or EMM platform to mass deploy configurations to your devices, Getac OEMConfig unlocks access to enhanced proprietary settings for Getac Android devices. OEMConfig allows for greater agility and flexibility within your solution.

Getac Device Monitoring System

GDMS ensures every device in your network is fully maintained. It tracks and monitors deployed devices, spotting potential issues before they impact on field-based personnel. GDMS helps you to ensure operational efficiency and reduce interruptions and device downtime by monitoring battery performance, storage, firmware issues, and more.

UTILITY SOFTWARE SUITE

Getac Driving Safety Utility

Whether you are operating commercial vehicles or forklifts, Getac Driving Safety Utility eliminates visual distractions to help drivers stay focused and safe. Getac's Smart Docking feature allows the screen blanking functionality to be enabled when the device is docked in-vehicle, then automatically disabled when the device is undocked.

FULLY RUGGED WARRANTY AS STANDARD INCLUDING ACCIDENTAL DAMAGE

Ensuring enhanced total cost of ownership (TCO)
