

GETAC SELECT

What is “Getac Select Solutions”

As a leader in providing rugged mobile solutions in the industry, we listen to customers and want to take our Customer Experiences to the next level. We understand the challenges in your daily business and the frustrations you may have while selecting suitable solutions to achieve your business objectives or solving these challenges.

To further separate Getac from the competition, Getac now offer a comprehensive Industry solutions program, called “**Getac Select Solutions**”.

With our years of industry knowledge and experience, and combined with our successful deployments to our customers globally, “**Getac Select Solutions**” shortlists the most appropriate solution options for you to choose from.

That includes :

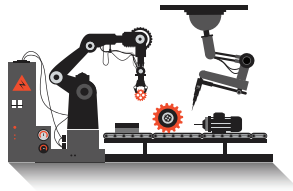

1. Getac Select - Devices
2. Getac Select - Accessories
3. Getac Select - Software
4. Getac Select - Professional Services

Benefits

- Readily available devices / faster delivery time
 - Configurations that have been created using Getac’s experience but also future market trends and demand
 - Specific solution feature combinations that you may not see in the market.
 - Solutions are tested and certified by Getac
 - **Getac Select Solutions** offers “Single Location Concept/Portal” to simplify searching for different products vendors to solve your business challenges.

Software

Getac Driving Safety Utility

Driver Occupational Health and Safety (OHS) is critical to enterprises when their most valuable assets are the vehicles as well as the person behind the wheel. Increasing driving safety is therefore not just drivers' but also the corporates' responsibility. Getac Driving Safety Utility features admin configuration ability for enterprises to configure functions based on their workflows.

Getac KeyWedge Barcode Reader Utility

Barcode reader has become a common tool for text/ object recognition in modern day enterprise mobile devices. Mobile computing devices with barcode readers help to eliminates human errors and provides swift solution with a simple scan. Getac offers not only traditional hardware barcode readers, but also utilize tablet embedded camera to develop KeyWedge Barcode Reader Utility to serve different user groups with great user experience.

Getac Device Management Software

Getac Device Management System (GDMS) is a SaaS system solution hosted centrally on Microsoft Azure Cloud Server. With data stored securely on Azure SQL Database, GDMS allows enterprises to manage and monitor end point device health condition in real time and spot potential issues proactively. It also helps achieve minimum down time, maximum productivity and device utilization rate.

Bittium

Bittium SafeMove Mobile VPN remote access solution provides always-on, secure and seamless connectivity for mobile workers. With Bittium SafeMove, all mobile workers can enjoy hassle-free, zero-click access to the best available network wherever their work takes them.
