

WAREHOUSE & MATERIALS HANDLING

MATERIALS CHALLENGES

The recent global financial crisis and fluctuations in demand, are both posing serious challenges for those handling materials and managing warehouse operations. The best way of ensuring sustainability and longevity is to overcome some of the common challenges that impact on operational efficiency.

Warehouse operatives work in multiple locations, indoors and outdoors. They need to dock & undock the device and carry it around to complete tasks without interruption. Traditional fixed device terminals don't allow for the flexibility to remove them for maintenance or if the material handling vehicle is out of action due to breakdown or maintenance.

Devices need to be fully operational in all weather and temperature conditions, built to survive drops, knocks and dust. Devices used for materials handling will be subject to a range of harsh environments such as large temperature ranges or shock and vibration.

Purchasing every component required to satisfy a specific application, like a forklift mounted solution, can be complex and problematic. Compacted by the challenges faced whilst attempting to integrate the hardware and software.

Due to the diversity of warehouse tasks, devices may require different screen sizes and features.

Getac are perfectly positioned to deliver optimal solutions for efficient workflows, accurate record keeping, cost reduction and minimising handling errors.

RUGGED MATERIALS HANDLING SOLUTIONS

GETAC RUGGED DEVICE

Built to thrive in extreme weather conditions and withstand impacts and drops up to six feet, helping your workforce to face whatever challenges they meet.

GETAC SOFTWARE

Our software solutions support worker safety, device deployment and uptime to enhance productivity.

THIRD-PARTY SOFTWARE

Device and data security. uninterrupted secure communications, and the latest in WMS.

SERVICE & SUPPORT

3 years bumper-to-bumper accidental damage cover as standard across the

fully rugged device range, plus you can

keep your devices functioning at peak

performance, with the Getac

Self-Maintainer Programme.

KEYBOARDS

The Getac Rugged Keyboard is designed with VESA and AMPS mounting capability that allow it to be placed firmly in the vehicle.

Getac and strategic partners work together to deliver robust, rugged demountable computing solutions ideally suited to warehousing and materials handling applications.

CARRYING SOLUTIONS

A diverse range of mobile accessories, designed for enhanced mobility, hands-free use, and reduced end user fatigue.

BARCODE SCANNERS

հան

LIIIII

Getac offer embedded barcode reader options on our rugged devices, or alternatively we can supply third-party barcode scanners, to meet individual requirements.

MOUNTING OPTIONS

Wherever you need to secure your device, we offer a superior range of turnkey mounting solutions that are configurable to any vehicle or workspace.

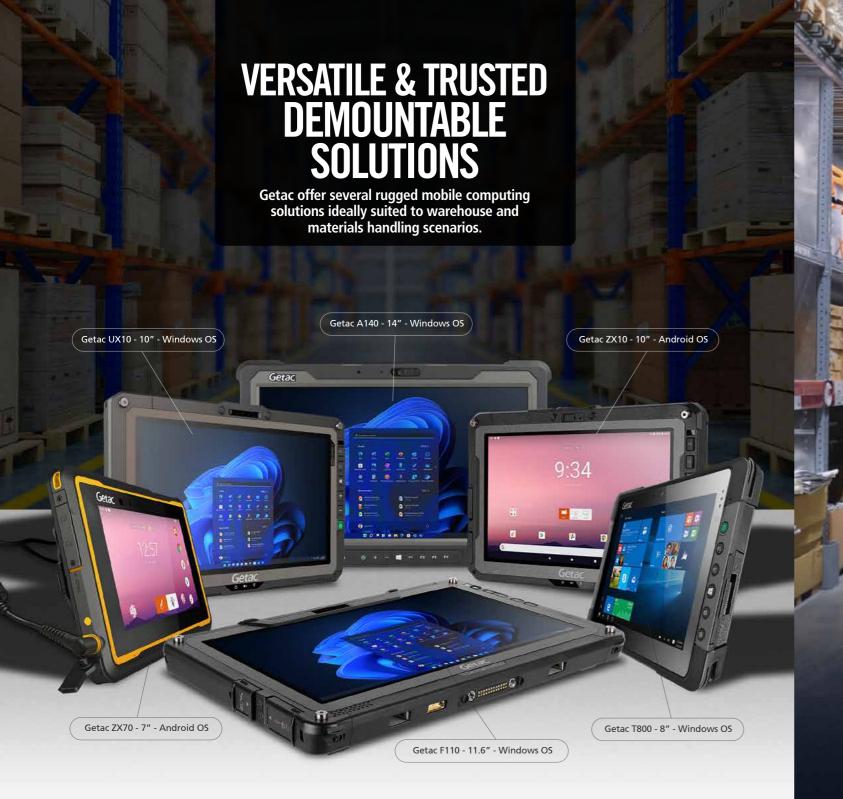

CRADLES & DOCKS

Secure your rugged tablets with a custom designed cradle or docking station, one-hand docking and release for efficient and easy everyday use. With the added benefits of port expansion for enhanced interoperability.

POWER CHARGING OPTIONS

Rugged power adapters and battery chargers designed specifically for Getac devices.

In every industry we support, we're passionate about ensuring uptime across mobile workforces. In materials handling, our rugged and complete solutions enhance operational efficiency, increase productivity, and reduce device downtime.

Whether you are picking, packing, managing stock levels or processing orders, Getac offer a comprehensive range of rugged devices to assist you in your workflow effectiveness.

CHOOSING YOUR GETAC MATERIALS HANDLING SOLUTION

HAVIS

What type of materials handling equipment requires devices to be fitted to?

FORKLIFT TRUCKS
REACH TRUCKS
PALLET RIDERS

Do you need to mount additional peripherals?

RUGGED KEYBOARDS BARCODE SCANNERS MOBILE PRINTERS

Do you require port replication?

We offer a range of docking stations with peripheral port replication that allow for easy docking and undocking. Where port replication is not required, Cradles are available as a more costeffective solution.

CHOOSING YOUR GETAC MATERIALS HANDLING SOLUTION

A STEP BY STEP GUIDE

Which power adapter do you need?

Check the VIN plate to identify the vehicle models and battery voltage before choosing the corresponding DC/DC adapter.

Electric materials handling vehicles require a DC/DC isolated adapter to keep connected devices/docks safe from voltage spikes generated by the power system of the vehicle.

Where will you be mounting the device?

ROOF MOUNTING OVERHEAD GUARD

POLE MOUNTING OVERHEAD GUARD LEG DASHBOARD MOUNTING

Does the forklift have a cab with windows?

It can be challenging to mount to vehicles with a cab but we have a number of proven solutions to overcome this.

Choose your software solution?

ENTERPRISE SUITE

Getac deployXpress® **Getac OEMConfig**

UTILITY SUITE

Getac Driving Safety Utility

Important to remember when defining the full mounting gear

Choose a bracket to hold the solution to the vehicle securely – using a no drill solution which will not compromise the safety systems of the vehicle.

Choose a motion bracket to allow the device to be placed in the optimal location for safety and ease of use. Consider other possible mounts for the accessories such as keyboards or barcode scanners.

Do you need a carrying solution?

Full range of mobility options for carrying and holding the devices when in use.

Full range of mobility options for carrying and holding the devices when in use.

nomic – Shoulder straps and hand straps.

Additional device protection from scrapes and bumps.

Multi-functional – carrying and desktop use with easel

REDUCE DRIVER DISTRACTION ON THE MOVE

Workforce Safety for Forklifts and Commercial Vehicles

Getac Driving Safety Utility

Your people are your most valuable assets. Whether they are driving a forklift truck in the warehouse or a commercial vehicle on the road, you need to protect your workforce.

Getac Driving Safety Utility is a value-added solution aimed at reducing driver distraction. Reducing visual and manual distractions helps the driver to effectively monitor their surroundings and keep the vehicle under control.

Getac's software solutions are aimed at boosting productivity and operational efficiency.

REDUCE THE RISK OF DEVICE DOWNTIME
